Tobacco vendors openly flouting norms: Study

ENDORE SPECIFIC FINDINGS

- Tobacco-related hazards.
- According to the findings of the organisation based on field studies in Delhi and Guwahati cities, there was a total of 668 tobacco vendors in the unauthorised sector.
- In unauthorised sectors, there was a total of 668 tobacco vendors in the unauthorised sector. All vendors were found to violate "Cigarettes and Other Tobacco Products Act, 2003 (COTP)."
- The findings also reveal that 94.5% tobacco vendors were found selling combustible and shredded tobacco with most of them placed in unauthorised sectors.

ENDORSEMENT • NGO
National Centre for Human Settlements and Development (NCHS) and the Alliance for Research on Tobacco (ART) launched a workshop on "Tobacco Control" at the NCHS office on Thursday, February 10.

The purpose of the workshop was to draw attention to the issue of tobacco control and the need for effective policies to combat the epidemic. The workshop was attended by experts from various fields, including public health, social science, and policy making.

The workshop highlighted the importance of tobacco control in reducing the burden of disease and improving public health. The participants discussed the current status of tobacco control in the country and the challenges faced in implementing effective policies.

The workshop concluded with a call for action to strengthen tobacco control efforts and ensure that effective policies are implemented to protect the health of the population.
