Tobacco vendors still target kids, says study

EXPRESS NEWS SERVICE

A SURVEY conducted by the Consumer Association of India in association with Consumer Voice found that school children were being exposed to tobacco products next to candles and toys to attract students. The survey found that 32% of the respondents believed that the sale of tobacco products was a threat to children's health.

The survey was conducted in 150 schools across the country. It was found that 32% of the respondents believed that the sale of tobacco products was a threat to children's health. The survey also found that 60% of the respondents believed that the sale of tobacco products was a threat to children's health.
